

Rolling slabs

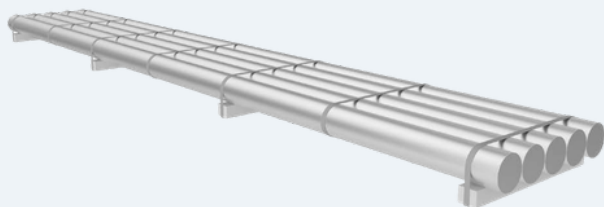

Our advanced casting technology delivers exceptional flexibility in rolling slab production, with dimensions tailored to demanding applications. Manufactured across a broad range of aluminium alloy series - our slabs are designed to meet high requirements for quality, consistency and performance.

Alloy series: 1xxx, 3xxx, 6xxx as well as A5-A7 grades.

Length mm: Up to 4100

Dimensions mm: 330x1300, 330x1440, 370x950, 370x1050, 370x1150, 370x1250, 370x1300, 370x1440, 400x1300, 400x1440, 460x1440, 500x1440, 525x1440, 550x1440, 600x1440

Extrusion Billets

Our premium aluminium billets deliver high precision, consistent quality and reliable performance. Manufactured to international quality standards and designed to customer specifications, they support efficient downstream processing in demanding applications such as extrusion, solar energy and wheel production.

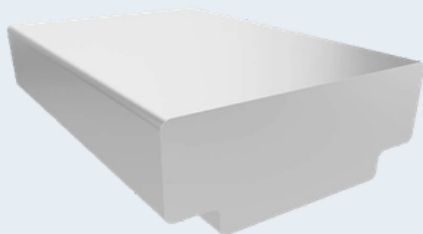

Alloy series 1xxx, 6xxx: 1070, 1070A, 1050,

6005, 6005A, 6060, 6061, 6063, 6082, 6101, 6360, 6460, 6560

Dimensions Ø: 152, 178, 203, 228 mm

Wagstaff Airslip Technology

Re-Melting Ingots

We supply high-quality primary aluminium for remelting, sourced from the global market and delivered as alloyed T-bars. Our portfolio cover grade P1020 with the flexibility and reliability required to meet diverse production needs across a broad range of industries, providing consistent quality and dependable performance in every application.

T-BAR: P1020 (99,7)

Length: according to customer specification

Dimensions mm: 850x460
